TWO YOUNG PEOPLE ESCAPE SERIOUS INJURY

Murray Wins Over Western Saturday

Murray State Thoroughbreds won out over the Western Hilltoppers Saturday night before a crowd-packed Carr Gym, 77-67.

The Racers of Coach Harlan Hodges used a special zone defense that stopped the highly touted Hilltoppers, ninth team in the nation.

Murray controlled the baskets to such an extent that most of the Western shooting was from the corners and far out on the floor.

Art Spoelstra was held to ten points and went out of the game in the third quarter trying to stop Murray States "Old Man" Behear.

Behear totaled 26 points for the night with he and Crittenden, Koenigsmark and Starkey pacing the Racers victory.

Murray made good on 35 out of 45 tries at the free throw line.

Crittenden played an outstanding game, putting on a dribbling performance that rattled the Hilltoppers and tied two men to him most of the night. Crittenden finished with 22 points.

Western lost four men on fouls. Spoelstra, Vest, Green and Smith.

Starkey was the lone Murray man lost on fouls. Murray hit 66 per cent of their shots while Western hit 56 per cent.

The funeral will be held Tuesday at 2:00 p.m. at the North Side Baptist Church in Princeton with Bro. Parent and Bro. Hatler officiating.

The funeral arrangements are in charge of the Morgan Funeral Home in Princeton where friends may call until the funeral hour.

Boy Scout Kick Off Breakfast Will Be Held Tuesday Morning

Senator James M. Lassiter announced today that the annual finance campaign for the Boy Scouts of America will get under way in Murray and Calloway County, Tuesday morning, February 17, when local workers get together for a "Kick Off" breakfast at the Murray Wamans Club House. The breakfast will begin at 7:00 o'clock.

Workers will get their instructions, prospect lists, and cards after which they will start solicitation. Senator Lassiter, Campaign Chairman, expressed the hope that the drive could be completed in two days.

Scout officials are optimistic as they point out that Scout drives in the past have been quite successful in this county. The district now has a new Field Scout Executive, and prospects for new troops are indicated. A commission staff has been organized and staff training conferences have been held to assure a supply of trained local leaders. It is hoped that the Boy Scout program can be carried to a number of new boys.

In an announcement today, Senator Lassiter urged everyone to contribute as liberally as possible to this worthwhile program for youth. He also urged those persons who are not contacted to send their contribution to the Murray Chamber of Commerce Office, where Mrs. Lassiter will act as treasurer.

An advance gifts committee started their work earlier in the week. On the list were George Hart, Jerry Dent, Bob Miller, George E. Overby, Holmes Ellis, A. E. Simmons, H. T. Waldrup, and E. F. Settle.

Other solicitors who have been appointed by Lassiter and who are expected to meet Tuesday morning are:

Miss Shirley Alexander Injured In Two-Car Crash Yesterday

A Murray girl was injured yesterday in a two-car collision on the East highway about 5 o'clock, about six miles from Murray. Two other people received slight injuries.

Injured were: Miss Shirley Alexander, daughter of Mr. and Mrs. Leo Alexander.

Jackie Burkeen, son of Mr. and Mrs. B. W. Burkeen.

State Police reported that Burkeen and Miss Alexander were proceeding East on the highway to the lake and Butterworth was coming toward Murray. Burkeen was driving a 1946 Ford Coupe and Butterworth was driving a 1946 Mercury.

Apparently the Butterworth car swerved from the left lane into the car of Burkeen. No cause for the accident was given.

Burkeen's car came to a halt on the brink of a ten foot embankment and Butterworth's car stopped in the center of the highway. The front end of each car was completely demolished.

Miss Alexander received scalp and hand cuts and Butterworth received only slight scratches, and a bump on the head.

Butterworth's six year old son was thrown from the automobile completely across the highway, and landed unhurt in a ditch by the side of the road.

The Butterworth's had been fishing and fishing poles and minnows were scattered over the highway. Five small dogs in the trunk of the Butterworth car were uninjured, and when the cover of the trunk was ruptured by the terrific impact, they scampered out.

A J. H. Churchill ambulance was called to the accident scene and quickly carried the injured to the Murray Hospital for treatment.

All were treated and released. State Police Corporal Brigham Futrell attended the accident.

F-80 Sabrejets screening the fighter-bombers from attack by Communist MIG-15's probably destroyed one of the Russian-built jets and damaged two others in duels over MIG alley.

Meanwhile, fragmentary and unconfirmed reports indicated U. N. and communist troops fought inside the Panmunjom neutral zone Sunday night or early today.

The eighth Army reported that a Red patrol trailed U. N. troops back to Allied positions on the western sector after a fight in no-man's land. There was no mention of the exact location.

Official resources refused to comment immediately. The U. N. truce camp at Munsan said it was "waiting for a report."

The Kiyomoto raid followed huge attacks against the Suifu Reservoir on the Manchurian border and a powerful Superfort attack on a Red supply depot eight miles north west of Pyongyang. Both attacks took place Sunday night.

Meanwhile the Navy began its third year of a siege of the east coast port of Wonsan, the longest in U. S. Naval history. The heavy cruiser Toledo and the destroyers Oliver Moore and Wedderburn opened up at 8:30 a.m., sending tons of explosives into supply positions.

The navy heralded the beginning of the third year with a statement Saturday saying Wonsan has been "destroyed" and effectively "neutralized" by the siege imposed by the ships of nine nations.

Cites 'Love' Letters Different

INDICTED on charges of attempted murder, Richard LaForce, shown in Los Angeles, said he would insist that long letters written to him by Mrs. Joyce Hayden, whose husband he is accused of attempting to poison, be made public. LaForce, a brilliant California Institute of Technology science student who has known Mrs. Hayden since the sixth grade, said he wished to substantiate his claims of "love passages."

Technique In 3-D Movies

What does Hollywood's switch-over to three-dimensional films mean to the movie-goer? He'll see new medium of entertainment, as different from flat pictures as the three-dimensional picture.

By ALINE MOSBY
United Press Staff Correspondent
HOLLYWOOD — Movie fans can say good-bye to close-ups, intimate love scenes, moving camera, little sets and entire "talkie" technique.

Director Henry Koster explained today the new three-dimensional films require an entirely different technique—since they are more different from flat pictures than the silents were from sound motion pictures.

Movie-making hasn't changed much since D. W. Griffith and other early cinema pioneers developed the principles of close-ups and cutting and having the camera move from object to object.

Now, directors, confronted with the new 3-D medium, have to throw those ideas out and start all over again.

Three-D films, Koster says, will be more like watching a stage play, where the characters move but the camera seldom does, and shots are much longer with a minimum of cutting.

Close-ups, as film audiences know them, are impossible on the giant screen of cinema or cinemascope that gives the illusion of three-dimension.

"You can't have a close-up, or two-thirds of the screen will be empty," explained Koster who is directing "The Robe" in cinemascope at 20th Century-Fox.

The actor would look deserted. The way to focus attention on an actor would be to fade the background into darkness or out of focus.

Three-D pictures will eliminate "quick cutting," since on the large screen, jumping from image to image of disturbing to the eye. Most movie shots now last from four to 10 seconds, but 3-D shots will run into minutes.

Most camera movement is banished forever, too. The camera can't move sideways or up and down or the audience will get dizzy, Koster explained.

"He said directors also have to figure new ideas of staging for the cinemascope screen, as it is 1 1/2 times as long as it is high. Three-D means more extras and wider sets to fill out the huge backgrounds."

"Three-D movies will be great for extras and set designers, but bad on cutters," Koster explained. "They also are very stimulating to directors."

"Movie-making was becoming stale. When I would read a script over dinner, I knew between the fruit and the cheese that I would need a long shot, a close-up and then a pan shot to the murderer as he closes in on the victim."

"But now we are pioneers, and I feel very ambitious."

Flowers May Need After-Winter Care

Flowering perennials, such as delphinium, columbine, sweet william and gallardia, that have been forced out of the ground by alternate freezing and thawing, should be pushed back into the soil with a gentle pressure of the foot, says Prof. N. R. Elliott of the University of Kentucky horticulture department. To neglect doing so means that the roots might dry out and die, due to the air pockets formed below the crown as the plant was lifted. This condition seldom happens when plants have been properly mulched in late fall, Mr. Elliott stated.

Testing Soil Pays In Taylor County

The 3,775 soil tests made in the past three years in Taylor county show that the need for lime, phosphorus and potash still exists, says UK County Agent C. V. Bryan.

Seventy-three percent of the tests showed "need" for lime, 79 for phosphorus and 71 for potash. Land that was high in potash 25 years ago is now deficient in this element, especially if heavily chopped.

O. B. Boutin reported increases of 800 to 2,115 pounds of tobacco an acre in three years of soil testing. D. H. Noel said testing soil and then fertilizing according to needs enabled him to sell tobacco for 63 cents a pound.

Bryan said that tests showed that average tobacco land needed 350 to 450 pounds of potash an acre. Potash also improved leaf quality. D. H. Noel picked up 715 pounds of leaves that sold for 63 cents a pound.

Floor Covering

Many farmers now are following soil tests, which make it possible for them to apply just what the land needs, and often saves them considerable money in fertilizer costs, Bryan explained.

Soil tests have trebled the sale of potash in Taylor county, the county agent said. This season 2,500 acres of pastureland will be topdressed with potash instead of phosphate. This will be the first use of potash on grass.

A soil-judging school held this winter on the farm of S. V. Kessler and Son attracted attention. Bryan says interpretation of soil tests has become one of his big jobs.
